

Haiku is an online learning management system that allows students and teachers to interact and communicate seamlessly and efficiently. Students are given personal accounts that allow them to access resources including current assignments, class notes, recent grades, and upcoming events. Students are responsible for checking Haiku on a regular basis. Teachers use Haiku as a tool to support students and their learning. Students may find helpful resource pages, copies of important lectures, and course announcements as they explore the Haiku pages their teachers have created.
